## **DETAILED ACTION**

### ***Drawings***

1. The drawings were received on 06 October 2004. These drawings are accepted.

### ***Allowable Subject Matter***

2. Claims 1-7 are allowed over the Prior Art of record.
3. The following is an examiner's statement of reasons for allowance: The primary reasons for allowance of claim 1 is the inclusion of the limitations of a method of monitoring dual-phase liquid and interface levels employing a floating level element floating on an upper surface of a product layer of liquid; providing a first pressure transducer that is connected to the level element at a fixed distance below the level element, the distance being such that the first pressure transducer is suspended in a heavier of one of the two liquids being monitored, continuously monitoring the output signals from the first pressure transducer indicating measured fluid pressure and the output signals from the level element measuring fluid pressure and comparing the output signals to a reference pressure to calculate the level of a groundwater and product interface and a thickness of the product layer. The closest reasonable Prior Art reference is US 5,347,864 to Senghaas et al. (see Fig. 1 below) which discloses a method of monitoring the liquid levels in a dual-phase liquid interface levels via first (112) and second (114) level elements floating on a first (102) and second (105) fluid layers, respectively and the measuring of the thickness of the fluid layers by the location of the level elements via output signals.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
